

# We are the 99%

While the rest of us suffer through a worldwide economic crisis, the people at the top are just getting richer. For the rest of us, nothing's getting better: the Government is cutting hospitals and libraries, rolling back social services, shutting down buses and selling our land to the highest bidder. The wealth that it takes to get us out of this mess is right in front of us—we know because we are the ones who created it.

We fly the  
numbers,  
running.  
watch

planes, nurse the sick, crunch the  
grow the food, and keep this society  
All the wealthiest do is sit there and  
their money make more money.

**We are the 99% and we are more  
powerful than they'll ever be.**
